Attorney Docket No.: 03678.0023.CNUS03

#### THE AMENDMENTS

#### In the Claims

1. (Currently Amended) A method of enhancing drainage of the lacrimal system comprising the step of administering to the eyes of a subject an effective amount of a preparation comprising a dinucleoside polyphosphate as depicted in Formulae II, II(a) and II(b), or their a pharmaceutically acceptable salts salt therof;

whereby said preparation is effective in enhancing drainage of the lacrimal system in the eyes in the subject:

# **FORMULA II**

wherein:

X is oxygen, imido, methylene or difluoromethylene;

n = 0 or 1;

m = 0 or 1;

n + m = 0, 1 or 2; and

B and B' are each independently a purine residue, as in Formula IIa, or a pyrimidine residue, as in Formula IIb, linked through the 9- or 1-position, respectively:

Attorney Docket No.: 03678.0023.CNUS03

#### Formula IIa

$$R_3$$
 $R_1$ 
 $R_1$ 
 $R_2$ 
 $R_3$ 
 $R_3$ 
 $R_4$ 
 $R_2$ 
 $R_3$ 
 $R_4$ 
 $R_4$ 
 $R_5$ 
 $R_6$ 
 $R_7$ 
 $R_8$ 
 $R_9$ 
 $R_9$ 

wherein:

R<sub>3</sub> is H or NHR<sub>1</sub>;

 $R_1$  of the 6- or 8-HNR<sub>1</sub> groups is selected from the group consisting of hydrogen, arylalkyl ( $C_{1-6}$ ) groups[[;]], and alkyl groups with functional groups selected from the group consisting of carbamoylmethyl-, and  $\omega$ -acylated-amino, hydroxy, thiol or carboxy derivatives, where the acyl group is selected from the group consisting of acetyl, trifluroacetyl trifluoroacetyl, benzoyl, and substituted-benzoyl;

## R<sub>2</sub> is O or absent; or

R<sub>1</sub> and R<sub>2</sub> taken together form a substituted 5-membered fused imidazole ring;

### Formula IIb

$$R_7$$
 $R_6$ 
 $R_5$ 
 $R_8$ 
 $R_8$ 
 $R_8$ 
 $R_8$ 
 $R_8$ 
 $R_8$ 
 $R_8$ 

Attorney Docket No.: 03678.0023.CNUS03

wherein:

 $R_4$  is hydroxy, mercapto, amino, cyano, aralkoxy,  $C_{1-6}$  alkoxy,  $C_{1-6}$  alkylamino or dialkylamino, with the alkyl groups optionally linked to form a heterocycle;

R<sub>5</sub> is hydrogen, acyl, C<sub>1-6</sub> alkyl, aroyl, C<sub>1-5</sub> alkanoyl, benzoyl, or sulphonate;

 $R_6$  is hydroxy, mercapto, alkoxy, aralkoxy,  $C_{1-6}$ -alkylthio,  $C_{1-5}$  disubstituted amino, triazolyl, alkylamino or dialkylamino, where the alkyl groups are optionally linked to form a heterocycle or linked to  $N^3$  to form an optionally substituted ring;

 $R_7$  is hydrogen, hydroxy, cyano, nitro, alkenyl with the alkenyl moiety optionally linked through oxygen to form a ring optionally substituted on the carbon adjacent to the oxygen with alkyl or aryl groups, substituted alkynyl, halogen, alkyl, substituted alkyl, perhalomethyl,  $C_{2-6}$  alkyl,  $C_{2-3}$  alkenyl, or substituted ethenyl,  $C_{2-3}$  alkynyl or substituted alkynyl;

or together  $R_6 - R_7$  form a 5 or 6-membered saturated or unsaturated ring bonded through N or O at  $R_6$ , such a ring optionally contains substituents that themselves contain functionalities; provided that when  $R_8$  is amino or substituted amino,  $R_7$  is hydrogen; and

R<sub>8</sub> is hydrogen, alkoxy, arylalkoxy, alkylthio, arylalkylthio, carboxamidomethyl, carboxymethyl, methoxy, methylthio, phenoxy or phenylthio.

- 2. (Original) The method according to Claim 1, wherein said method treats nasolacrimal duct obstruction.
- 3. (Withdrawn) The method according to Claim 1, wherein said compound is a compound of Formula I.
  - 4. (Canceled)
- 5. (Withdrawn) The method according to Claim 1, wherein said compound is a compound of Formula III.

Attorney Docket No.: 03678.0023.CNUS03

6. (Withdrawn) The method according to Claim 1, wherein said compound is a compound of Formula IV.

- 7. (Previously Presented) The method according to Claim 1, wherein said administration involves topical administration of said compound via a carrier vehicle selected from the group consisting of drops of liquid, liquid wash, gels, ointments, sprays and liposomes.
- 8. (Currently Amended) The method according to Claim 7, wherein said topical administration comprises infusion of said compound to said an ocular surface via a device selected from the group consisting of a pump-catheter system, a continuous or selective release device, and a contact lens.
- 9. (Previously Presented) The method according to Claim 1, wherein said administration involves systemically administering a liquid or liquid suspension of said compound via nose drops, nasal spray, or nebulized liquid to oral or nasopharyngeal airways of said subject, such that a therapeutically effective amount of said compound contacts the eyes of said subject via systemic absorption and circulation.
- 10. (Previously Presented) The method according to Claim 1, wherein said administration involves systemically administering an oral form of said compound, such that a therapeutically effective amount of said compound contacts the eyes of said subject via systemic absorption and circulation.
- 11. (Currently Amended) The method according to Claim [[9]] 1, wherein said administration involves systemically administering an injectable form of said compound, such that a therapeutically effective amount of said compound contacts the eyes of said subject via systemic absorption and circulation.
- 12. (Currently Amended) The method according to Claim [[9]] 1, wherein said administration involves systemically administering a suppository form of said compound, such that a therapeutically effective amount of said compound contacts the eyes of said subject via systemic absorption and circulation.

Attorney Docket No.: 03678.0023.CNUS03

13. (Currently Amended) The method according to Claim [[9]] 1, wherein said administration involves systemically administering an intra-operative instillation of a gel, cream, powder, foam, crystals, liposomes, spray or liquid suspension form of said compound, such that a therapeutically effective amount of said compound contacts the eyes of said subject via systemic absorption and circulation.

- 14. (Original) The method according to Claim 1, wherein said compound is administered in an amount sufficient to achieve concentrations thereof on the ocular surfaces of said subject of from about 10<sup>-7</sup> to about 10<sup>-1</sup> moles/liter.
- 15. (Currently Amended) A method of enhancing drainage of the lacrimal system in eyes comprising the step of administering to the eyes an effective drainage-enhancing amount of P<sup>1</sup>, P<sup>4</sup>-di(uridine-5')-tetraphosphate, or a pharmaceutically acceptable salt thereof.
- 16. (New) The method according to Claim 1, wherein said method enhances clearance of the nasolacrimal duct.
- 17. (New) The method according to Claim 16, wherein said method treats nasolacrimal duct obstruction.
